PROFESSIONAL SUMMARY

Analytical and detail-oriented Software Engineer with hands-on experience in QA automation and a strong foundation in full-stack development, cybersecurity, and AI integration. Proven experience in developing automation frameworks, executing manual and automation testing, and building scalable web applications. Skilled in Python, JavaScript, ReactJS, Angular, Bootstrap, Linux, and cloud technologies including GCP and Kubernetes. Experienced in API testing, debugging, and integrating AI technologies to improve system reliability and streamline software delivery.

TECHNICAL SKILLS

Programming Languages: Python, Java, C/C++, JavaScript, XML, YAML

Web & Frameworks: ReactJS, Angular, Bootstrap, HTML, CSS, Drupal CMS

QA & Automation: Manual Testing, K6, Regression Testing, Test Framework Development, API Testing, Elasticsearch, Kibana, Postman

Cloud & AI Technologies: GCS, GKE, Vertex AI, Gemini, K8s, OpenAPI, REST APIs, Agentic AI

Databases & Tools: SQL (PostgreSQL), Firebase, RabbitMQ, Linux, Shell Scripting, Wireshark, Nmap, VMWare, Git, Canva, Adobe, Figma

Soft Skills: Leadership, Analytical Thinking, Team Coordination, Problem Solving, Adaptive Learner

PROFESSIONAL EXPERIENCE

IDfy | Automation + Manual QA Engineer

Jan 2026 – Jul 2026

Developed and enhanced the EVE Automation testing framework, implementing config-driven service filtering, container mapping, and support for new task types to broaden regression coverage.

Built core abort functionality for Batch Verify bulk regression runs, handling UI triggers, backend orchestration, Eve API integration, and state persistence.

Spearheaded Merlin integration into Devtools, including schema CRUD with YAML round-trip preservation, automated MR generation for K8s, and migration of OpenAPI spec generation to Vertex AI with multi-file GenAI token budgeting. Designed and implemented automated regression reporting, featuring customized spreadsheet exports, run-to-run baseline comparisons, and Google Chat notification integration with live previews and custom notes.

Restructured Elasticsearch/Kibana integration to extract Kibana metrics/logs, creating field-level accuracy tables, FNR/FPR reporting.

Executed manual functional, performance, and regression testing for 14+ releases and validated 40+ ML services and 36+ Verifire services, including Face Match, Tampering, and OCR systems.

Resolved critical bugs including Aadhaar fallback handling, stale cache state issues, and Batch Verify API's abort performance optimization.

SNDT Women's University, Juhu | Web Developer Assistant

Jun 2025

Assisted the university's website developer in maintaining and updating content using Drupal CMS.

Updated and managed content for 10+ institutional departments, ensuring accurate information display.

Handled media management tasks across departmental pages using various media tools to ensure consistent digital asset display.

Alhansat Solutions (Remote) | Full Stack Developer Intern & Team Lead

Sep 2023 – Oct 2023

Led a team of 5+ developers to build a web-based Time Zone Converter (TZC) application.

Contributed to 85%+ of the UI/UX and connectivity features using HTML, CSS, and JS, allowing users to compare times across 470+ cities in 35+ global time zones.

GDSC - IEEE Hackathon (Remote) | Front End Developer

Nov 2023

Designed 75%+ of the front-end interface for an E-Commerce website using HTML, JS, CSS, and PHP aimed at marketing products for local businesses.

Created the UI design, logo, custom background, and CSS layouts.

KEY PROJECTS

NetroAegis – Agentic AI Network Decision System

Python, ReactJS, Agentic AI, Cybersecurity

Designed an Agentic AI-based Network Decision System that autonomously analyzes network traffic, evaluates security risks, and recommends defense actions beyond traditional intrusion detection.

Integrated specialized AI agents (Observer, Intent, Risk, Defense, Explanation, Temporal, Context, Trust) to perform collaborative reasoning, contextual analysis, and adaptive threat assessment.

Processed real-time network telemetry to extract behavioral patterns, classify attacks, calculate dynamic risk scores, and generate human-readable explanations for every automated decision (Explainable AI/XAI).

Developed a React-based dashboard providing real-time visualization of monitored entities, threat timelines, risk levels, and AI-generated defense reasoning for security analysts.

Built a web-based dashboard system to manage, track, and report active projects and their funding statuses. Featuring CRUD, RBAC, File Management, Approval System and Version Control.

Contributed 90%+ of UI/UX, 75%+ of logic and database integration, and 70% of the overall project architecture.

Ethical Hacking & Network Security | Acmegrade Course Project

Oct 2023

Performed ethical reconnaissance on target websites to extract IP addresses and port numbers.

Captured and analyzed network packets across different protocols using Wireshark and Nmap.

Executed SQL injection on a test website to extract user data and identify vulnerabilities.

Android Development Projects | Acmegrade Course

Jan 2024 – Apr 2024

Created an initial Connect App UI featuring 60+ layouts based on structured wireframes.

Developed 9 mini-projects including a Tip Calculator, a Blog App using Firebase, and a Pokémon Data App using REST API, Retrofit, and Glide.

EDUCATION**B.Tech. in Computer Science & Technology**

Usha Mittal Institute of Technology, Juhu | 2022 – 2026

CGPA: 9.095

HSC (PCMB + IT)

St. Andrew's College of Arts, Science & Commerce, Bandra | 2020 – 2022

Percentage: 71.33%

SSC

St. Lawrence High School, Santacruz | 2020

Percentage: 86.80%

ADDITIONAL HIGHLIGHTS**Publications**

Learning the Learning Process: A Psychological Aspect – The Writers' Club UMIT (Nov 2023)

The Revolution of the Automation: The Future of Cyber Security – GDSC UMIT (Sep 2023)

Courses Certifications

Cybersecurity - Reconnaissance, Network Scanning, WAA (Acmegrade), Android Development (Acmegrade), Blockchain (AWS), Gen AI (Google), Data Analytics (Udemy)

Google Cloud Skill Boost hands-on labs

Full Stack Development Bootstrap (Udemy)

Logos & Digital Product Design (Coursera)

Languages

English (B2), Hindi (Proficient), Spanish (A2), Korean (Elementary), Marathi (Native)

Awards & Achievements

'A' Certificate - NCC Naval Wing (2019)

Certificate of Merit - F.Y. B.Tech. (2022)

Best Student of the Year - HSC (2021-22)

Award of Excellence - 11th & 12th HSC

NASA Space Camp Round 1 Qualifier (Twice)

1st Place: Tug-of-War & Box Cricket (2024, 2025)

2nd Place: Literary (Poem) Comp. (2023)

3rd Place: Science Exhibition (2021-22)

Extracurricular Activities

PR Exec & Graphics Member, The Writers' Club UMIT (2022–24): Led PR, managed sponsorships/events, Editorial Committee (Aikyam 2.0 & 3.0).

Creative & Sponsorship Member, Sport's Council UMIT (2022–23): Creative ideas, crafting, event setup.

NCC Cadet Junior Wing (2017–20): Drills, social service, leadership activities.
